WHAT IS CLAIMED IS:

1. A recording medium having a data structure for managing playback control of the recording medium, comprising:

a navigation area storing an information file including a plurality of navigation segments representing one or more reproduction paths of a title, each of the navigation segments including at least one navigation command, a number of the navigation segments each including a navigation command for launching a playlist, and one of the navigation segments being an entry navigation segment of the title.

- 2. The recording medium of claim 1, wherein at least one branch point along the one or more reproduction paths occurs at a boundary of a launched playlist.
- 3. The recording medium of claim 2, wherein each branch point along the one or more reproduction paths occurs at a boundary of a launched playlist.
- 4. The recording medium of claim 3, wherein each of the number of navigation segments includes a navigation command for launching a different playlist.
- 5. The recording medium of claim 4, wherein each of the navigation segments

representing the one or more reproduction paths of the title includes a navigation command for launching a playlist.

- 6. The recording medium of claim 5, wherein each launched playlist includes navigation information for reproducing at least a portion of a clip file.
- 7. The recording medium of claim 6, further comprising:

a playlist area storing a playlist directory, the playlist directory storing the at least one playlist;

a clip information file directory storing at least one clip information file; and

a stream directory storing at least one clip file.

- 8. The recording medium of claim 1, wherein each of the number of navigation segments includes a navigation command for launching a different playlist.
- 9. The recording medium of claim 1, wherein each of the navigation segments representing the one or more reproduction paths of the title includes a navigation command for launching a playlist.
- 10. The recording medium of claim 9, wherein each of the navigation segments representing the one or more reproduction paths of the title includes a navigation command for launching a different playlist.

- 11. The recording medium of claim 1, wherein each launched playlist includes navigation information for reproducing at least a portion of a clip file.
- 12. The recording medium of claim 1, further comprising:

a playlist area storing a playlist directory, the playlist directory storing the at least one playlist;

a clip information file directory storing at least one clip information file; and

a stream directory storing at least one clip file.

13. A method of recording a data structure for managing playback control of the recording medium, comprising:

recording an information file on the recording medium, the information file including a plurality of navigation segments representing one or more reproduction paths of a title, each of the navigation segments including at least one navigation command, a number of the navigation segments each including a navigation command for launching a playlist, and one of the navigation segments being an entry navigation segment of the title.

14. A method of reproducing a data structure for managing playback control of the recording medium, comprising:

reproducing an information file from the recording medium, the

information file including a plurality of navigation segments representing one or more reproduction paths of a title, each of the navigation segments including at least one navigation command, a number of the navigation segments each including a navigation command for launching a playlist, and one of the navigation segments being an entry navigation segment of the title.

15. An apparatus for recording a data structure for managing playback control of the recording medium, comprising:

a driver for driving an optical recording device to record data on the recording medium;

a controller for controlling the driver to record an information file on the recording medium, the information file including a plurality of navigation segments representing one or more reproduction paths of a title, each of the navigation segments including at least one navigation command, a number of the navigation segments each including a navigation command for launching a playlist, and one of the navigation segments being an entry navigation segment of the title.

16. An apparatus for reproducing a data structure for managing playback control of the recording medium, comprising:

a driver for driving an optical reproducing device to reproduce data recorded on the recording medium;

a controller for controlling the driver to reproduce an information file

from the recording medium, the information file including a plurality of navigation segments representing one or more reproduction paths of a title, each of the navigation segments including at least one navigation command, a number of the navigation segments each including a navigation command for launching a playlist, and one of the navigation segments being an entry navigation segment of the title.
